This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit, to change the point of diversion of the waters of an underground source as heretofore granted under Permit 87956, is issued subject to the terms and conditions imposed in said Permit 87956 and with the understanding that no other rights on the source will be affected by the change proposed herein. The well shall be equipped with an opening for measuring depth to water that meets the requirements of NAC 534.430. A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

Monthly records shall be kept of the amount of water pumped from this well and the records submitted to the State Engineer on a quarterly basis within 15 days after the end of each calendar quarter.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The total combined duty of water under Permits 87957 and 89076 shall not exceed the Net Irrigation Water Requirement (NIWR) adjusted amount of 387.5 acre-feet annually for irrigation within the described place of use.
